User Instructions

Four ventilation holes on the back: This bread storage container features ventilation holes on the back to expel excess water vapor, regulating temperature and humidity to extend the bread's freshness. Made of sturdy natural bamboo, it boasts excellent breathability and thermal conductivity.

Convenient sliding design: The reverse sliding rail structure ensures smooth, unobstructed movement, allowing for quick one-handed access to food, reducing opening and closing interference, and maintaining internal humidity balance and freshness.

3D protective door: The corrugated acrylic material effectively blocks insects, offering both privacy and aesthetic appeal. It neatly stores medicines and miscellaneous items and blends seamlessly into various home décor styles.

Multi-functional space utilization: The flat top design allows for stacking tableware or decorative items. The non-slip base enhances stability, and raised edges prevent items from slipping, maximizing countertop space utilization.

Natural and durable material: The container body is crafted from select bamboo, with breathable pores extending the food's freshness period. The smooth surface is easy to wipe clean, meeting both hygiene and long-term use requirements.
