Scalable silicone broom

1. Product Overview

This product is designed in a modern minimalist style and is made of a composite material of plastic and stainless steel. It cleverly combines the lightweight, flexible, and anti-collision characteristics of plastic with the sturdy, wear-resistant, and rust resistant advantages of stainless steel. The two materials are precisely connected and the process is neat. The product is designed with simple lines as its core language, without redundant decorations, and is suitable for various spatial styles such as modern home and office, balancing practicality and aesthetics. It can be used as a practical accessory for daily home and office use, and is a cost-effective choice for modern daily use.

2. Product Parameters

Main material: high-quality daily grade plastic+stainless steel

Product style: Modern and minimalist

Core use: Home/Office daily use

Applicable scenarios: Home living room, kitchen, bathroom, office desktop, etc

Core features: complementary materials, sturdy and lightweight, simple and versatile, easy to clean and maintain
Weight：80g

4. Safety & Warnings

Avoid violent falls, impacts, and squeezing of products, prevent plastic parts from cracking, stainless steel parts from deforming, or loose or separated joints between the two.

Do not expose the product to corrosive liquids such as strong acids, alkalis, alcohol, disinfectants, etc., to prevent stainless steel from being corroded and plastics from aging and cracking.

When children come into contact with or use it, adults should supervise the entire process to prevent them from biting plastic parts or bumping into stainless steel edges and corners, and to prevent injury.

If the product is equipped with small accessories (such as buckles, screws, etc.), regularly check the firmness of the accessories, tighten them in a timely manner if they become loose, and avoid the accessories from falling off or losing.

If the plastic part turns yellow, cracks, or deforms, or the stainless steel part shows severe rusting or deformation, the product should be replaced in a timely manner to avoid affecting normal use.

5. Usage Instructions

Preparation before use: Before the first use, clean the entire product with water and neutral detergent, wipe dry with a dry cloth, and then put it back into use.

Daily use: According to the actual purpose of the product (desktop placement/handheld use/easy storage, etc.), normal operation is required. For placement products, they should be placed on a flat and stable surface, while for storage products, overloading should be avoided.

Attention to use: During use, avoid pulling or prying the product joints with one hand to prevent separation and loosening of plastic and stainless steel.
